Themes for Discussion at Board of Trade Meeting. An important Board of Trade meeting will be held at the Municipal Court Rooms Wednesday evening, July 14, at eight o'clock.

Ralph Butts is still working on getting ready for the improvement of Main street, Norway. He plans to start street building at the head of Main street and build toward the corner of Main and Paris street, where connection will be made with the "Trunk road."

One of the latest styles of Fred L. Harrison, Norway, Maine. This is considered a great improvement on many methods is a cement street, similar to our sidewalks, only stronger. This would be a good thing to look up.

Don G. Seitz will explain the advantages of the new street to the Norway Main street builders, should the ones who have it in charge wish.

The Norway Board of Health should be connected with the public sewer, because Main street is built for a permanent street.

A long pull and a strong pull and Norway Main street will get there. Just think of the mud of Main street being transformed into a smooth, strong, clean, cement street. The first in the State of Maine.

The annual picnic of the school was held on June 25 at the home of Eli C. and Llewellyn A. Wadsworth. About eighty were present. Various sports and games were enjoyed at the house and lawn and the grove near by. It was considered that they never had a better picnic. The farm was settled 132 years ago and the house was built in 1815. It is doubtful if so large a group of youth and children ever gathered here before.

THE secret of a good appearance does not depend upon how much is spent for clothes, but how well the clothes retain the appearance of unwrinkled newness.

Almost any suit that fits properly will look well when first worn; the test comes after a period of service.

It is the remarkable way in which the test of service is met, that is building national favor for

The Other Costs Us \$1,635,000

This is to prove that you can't judge tires by looks.

Here are two Goodyear tires, seemingly identical. But one is built like many of its rivals. Goodyear extras are omitted. The other has those hidden values. And those unseen extras, on this year's output, will cost us \$1,635,000. This year's betterments alone add to our cost \$500,000 yearly. Yet our 1915 price reduction saves our users about five million dollars.

This is not a price excuse. Goodyear prices have been fairly racing down. Our late big reduction made the third in two years, totaling 45 per cent. No equal tire can compete.
